

### Revitalizing Therapy Formula 9 Thymus - Spleen (Thymoenzym®)

#### Problem

With age, organ function progressively decreases due to cell damage, caused mainly by oxidative stress; this generates loss of vitality and quality of life.

Depending on the level of oxidative stress, the immune system is progressively affected, resulting in infections and degenerative diseases.

#### Uses

Patients with immunosuppression and or receiving treatment for acute infections, chronic infections, chronic sinusitis, acute and chronic stress, and Aging.

#### Solution

The contribution of cellular cytokines and growth factors in embryonic extracts has a restorative and revitalizing effect at the cellular level, which increases the specific functionality of the organ to be treated.

Antioxidant enzymes neutralize free radicals, thereby reducing damage from oxidative stress.

#### Composition

##### Oral CELLORGANE 9 Each 500-mg enteric coated tablet contains:

Opotherapeutic cell extracts: Thymus Gland 50%, Spleen 20%, embryonic endoderm 10%, Thymoenzym, Placenta 10%;  
Antioxidant enzyme complex: Superoxide dismutase, glutathione peroxidase, glutathione reductase, glutathione transferase; Maltodextrin 10% and stabilizers.

##### Injectable CELLORGANE 9 Each 750-mg Lyophilized Vial contains:

Opotherapeutic cell extracts: Thymus 50%, Spleen 20%, Thymoenzym, embryonic endoderm 10%, Stabilizers and Mannitol 20%.

##### Each 10-ml/250-mg Solvent Vial contains:

Opotherapeutic cell extracts Placenta 10%, Vitamin D3 5000 IU, procaine 2%, Sodium chloride 0.9%; Enzyme complex: Superoxide dismutase, glutathione peroxidase, glutathione reductase, glutathione transferase, stabilizers and sufficient sterilized Water for injection.

#### Action Mechanisms

Formula components reach the cells directly or indirectly, in the case of oral products, by bloodstream, and are selectively incorporated into the cells through various means of cellular transport.

It acts revitalizing the adrenal glands at the cellular level, improving its functionality and reducing the risk of degenerative diseases.

#### Contraindications

- Allergies to animal proteins
- Allergy to any of its components
- Pregnancy and lactation

#### Posology

- **Immunosuppression, acute infections being treated, chronic infections, chronic sinusitis**

##### Orally:

Two tablets in the morning and 2 at night, for at least six months.

##### Intramuscular:

2 ml daily for 5 days, rest for two days and restart with 2 ml daily for 5 days. Repeat treatment at 6 months.

- **Acute and chronic stress**

##### Orally:

Two tablets in the morning and 2 at night, for at least three months.

##### Intramuscular:

2 ml daily for 5 days. Repeat treatment at 6 months.

The tablets are taken in the morning on an empty stomach and at night before dinner (30 minutes before meals).

##### NOTE:

The dose may be increased according to the clinical picture of the patient and the physician's discretion; the results depend on the completion of treatment.

IMMUNE SYSTEM

## Adjuvant treatment with:

Category	Therapeutic Class
<b>Immunomodulators</b>	Interferon alfa
<b>Antihistamines</b>	Loratadine, Desloratadine, cetirizine, levocetirizine
<b>Antibiotics</b>	Beta-lactams, aminoglycosides, cephalosporins, macrolides
<b>Antidepressants</b>	Selective serotonin reuptake inhibitors (SSRI): paroxetine, sertraline, fluoxetine, citalopram, escitalopram
	Serotonin–norepinephrine reuptake inhibitors (SNRIs): venlafaxine, duloxetine, Desvenlafaxine
	NaSSA: Mirtazapine
	Tricyclic: amitriptyline, clomipramine, imipramine
	MAOIs: Moclobemide
	Serotonin–norepinephrine reuptake inhibitor (SNRI): Reboxetine
<b>Erectile dysfunction (ED)</b>	Dopamine–norepinephrine reuptake inhibitor (DNRI): Bupropion
	Cyclic GMP-specific phosphodiesterase type 5 (PDE5): Sildenafil
